FOREWORD

Institute of Development Studies, Jaipur, Monitoring Institute in charge of monitoring of **12 (Twelve)** districts of **Rajasthan** State/UT feels privileged to be one of the Monitoring Institution across the country for broad based monitoring of SSA and RTE activities.

This is the 1st half yearly report for the year **2014-15** and is based on the data collected from **4** districts of **Rajasthan** namely **-Jaipur, Jhalawar, Kota and Sawai Madhopur..**

I hope the findings of the report would be helpful to both the Govt. of India and the State Government of **RAJASTHAN** State/UT to understand the grassroot level problems as well as achievement and functioning of SSA-RTE in the State and to plan further necessary interventions.

In this context, I extend my heartfelt thanks to **Shri Radhey Shyam Sharma**, Nodal Officer, Monitoring SSA-RTE and his team members who have rendered a good service by taking pains to visit the schools located in the most inaccessible areas and preparing the report in time. I am extremely thankful to the authorities of the State office and the district offices for their unhesitating cooperation during the time of data collection.

Professor Naresh Dadhich
Director
Institute of Development Studies,
Jaipur

Acknowledgement

This report would not have been possible without the active support of the State Project Office of SSA for **RAJASTHAN** and the district offices in respect of the districts visited. We thank the State Project Director, SSA-RTE and the District Project Coordinators of SSA-RTE for their cooperation.

Our heartfelt thanks are due to all the officials of SSA-RTE and Education Department who helped the members of the visiting team in conducting field visit and to all the headmasters and teachers in the schools visited who provided us with relevant information.

We also thank all others who have cooperated in the Monitoring and Supervision work.

We are also thankful to Govt. of India Officials, Additional Secretary(SE&L), Director and Deputy Secretary, Under Secretary, Department of School Education & Literacy, Ministry of Human Resource Development, Shastri Bhawan, C Wing, Room No. 405, New Delhi – 110001 for providing an opportunity to undertake monitoring activities of SSA-RTE and providing funds.

We are also thankful to Senior Consultant(Monitoring)SSA, EdCIL(India) Limited, Technical Support Group, Sarva Shiksha Abhiyan, Vijaya Building, 5th Floor, 17- Barakhamba Road, New Delhi-110001 looking after the Monitoring Institution activities and their staff for their continued support and valuable guidance from time to time.

We are also thankful to The Project Manager (SSA), Ed.CIL (India) Limited, Technical Support Group, Sarva Shiksha Abhiyan, Vijaya Building, 5th Floor, 17- Barakhamba Road, New Delhi-110001 for release of funds from time to time.

Name of the Nodal Officer:	Radhey Shyam Sharma
Designation as per the institution:	Project Associate/ Officer
Designation provided by MHRD:	Nodal Officer

**First Half Yearly Monitoring Report of- Institute of Development Studies, Jaipur on
MDM for the State/UT of Rajasthan for the period of
1st April to 30th September, 2014**

	d) Any other relevant documents. District wise list of schools indicating all types of irregularity/gaps in Mid Day Meal in surveyed schools (Annexure-2-18)	Yes, Attached

Executive Summary

1. The present study on Mid Day Meal Scheme in Rajasthan, forms part of the SSA Monitoring carried out by the Institute of Development Studies, Jaipur (MI). Four Districts Jaipur, Jhalawar, Kota and Sawai Madhopur were selected for this quarter. 40 schools and 1-4 Madarsas were selected randomly in each district. An effort was made to cover every block in the sample. Thus 160 elementary level schools and 10 Madarsas were selected for the study. Out of these schools- 12 were urban PS, 20 were urban UPS, 71 were rural P.S and 57 were rural UPS. There were no Special Training Centers functioning in the all four districts covered.
2. Out of 160 schools surveyed, cooking was being carried out in the school premises in 138 schools under the supervision of the SMC and in 22 schools MDM was being provided by Centralised Kitchen i.e. Akshay Patra Foundation. The MDM logo was not displayed in the schools and Madarsas surveyed and the teachers were not aware of the same.
3. Out of total schools surveyed, 94.4 percent schools reported that the MDM was served regularly in the past 12 months. In 5.6 percent schools there was an interruption in serving of MDM. The average number of the days MDM was disrupted ranged from 5-30 days. District wise situation reveals that in Jaipur district the NGO Akshay Patra had not supplied MDM in 3 schools; in two schools in Jhalawar and Kota districts the supply was interrupted due to irregular supply of food grain and in Jhalawar and Sawai Madhopur one school each there was no supply of MDM due to non availability of cooking cost. The MDM is being supplied regularly in all the 10 Madarsas.
4. According to the MDM register, out of the total children enrolled, 69.5 percent children (69.3 percent boys and 69.6 percent girls) were availing MDM on the day of visit of the MI. The percentage is higher in Jaipur followed by Kota and lowest in Sawai Madhopur district. Gender wise data reveals a higher percentage of girls are availing MDM in Kota.
5. Out of the total enrolment, 66.6 percent children (66.7 percent boys and 66.4 percent girls) were physically present and were availing of MDM. Districtwise percentage of physically present children was found higher in Kota (70.6 percent) and lower in Sawai Madhopur (61.1 percent).
6. It was found that 80.6 percent schools were receiving food grains on a regular basis. In 5.6 per cent schools the supply was irregular. In 1.2 percent schools food grain was delivered within a month; 61.9 percent schools reported that the food grain is delivered between one to three months, while 23.1 percent schools reported that it took more than three months for the food grain to be supplied. The food grain is supplied once in 3-4 months. Usually all the Madarsas had a stock of one month in reserve.
7. 80.6 percent schools reported that they had a buffer stock to deal with any situation of irregular supply, while the remaining stated that they do not keep a buffer stock. District wise position shows that number of schools not having buffer stock is higher in Jhalawar districts. With respect to the quality of food grain supplied, 1.8 percent teachers reported that the quality of food grain was good, whereas 79.4 percent teachers reported that it was average. 5 percent teachers articulated that the quality of food grain was poor. District wise situation reveals that quality of grains was found to be poorer in equal numbers of schools in Sawai Madhopur and Jaipur districts.
8. 38.1 percent schools reported that they have been receiving cooking cost in advance while the remaining (48.1 percent) schools had not received cooking cost in advance. 43.7 percent schools reported a delay of 1 month to 4 months in receipt of cooking cost.

In some schools there was a delay of more than four months in receiving the cooking cost. If we look at the district wise delay in cooking cost, we find that highest number of schools in Sawai Madhopur had not received cooking cost on time. In such situations the teachers often borrow cooking materials /spices from the neighboring shopkeepers. The main reason for delay in delivering cooking cost includes delays in transferring money from the district and block level into SMC account.

9. It has been observed that when the MDM is served children often sit according to their own preference, either with children from their own gender or caste affiliation. Gender based segregation is more evident in UPS. In 20.0 percent schools children were found to be sitting according to their own choice. In 63.8 percent schools children were found to sitting in line and taking MDM in an orderly manner. In 16.2 percent schools children were found to be in groups according to their sex. In 76.3 percent schools the MDM was being served by the cooks/helper. In 3.1 percent schools only girls were observed serving the MDM.
10. In 86.2 percent schools MDM was being prepared according to the pre- decided menu. In the remaining 13.8 percent schools food was not supplied as per Menu. Number of schools not supplying MDM as per prescribed Menu was higher in Jaipur followed by Jhalawar district.
11. In 93.7 percent schools, children reported that they were satisfied with the quantity of MDM. Satisfaction level was found to be higher in Kota followed by Jhalawar district. 89.4 percent children expressed satisfaction with the quality of meal supplied. However in Jaipur district children were not satisfied with the quality of meals provided. In all the Madaras the children expressed their satisfaction with the quality of MDM served.
12. 66.2 percent of the schools reported that the health check up is carried out once a year. 19 schools in Jhalawar have not conducted a health checkup during this session. In the surveyed schools it was found that 74.4 percent schools had maintained a health register. In majority of schools Iron Folic Acid Vitamins are not given regularly. In the Madaras covered in Kota and Sawai Madhopur, no healthcheck up had been carried out and health cards were not available.
13. Out of 160 schools surveyed cooking was being carried out in the school premises in 138 schools and in 22 schools MDM have been provided by Centralised Kitchen i.e. Akshay Patra. In the 138 schools where cooking was being carried out in the school premises, there were 231 cooks (205 women and 26 men) appointed. 88.7 percent are women cooks. The caste composition is as follows: 13.4 percent women and 0.9 percent men belong to SC groups. 12.1 percent women and 3.0 percent men belong to ST group, about 51.2 percent women and 6.0 percent men belong to OBC groups. 5.6 percent women and 1.3 percent men belong to forward caste groups. There were no male and female cooks from minority groups. Caste wise situation reveals that highest number of women and men belong to OBC group. In the Madaras it was reported that there was a delay in releasing payment to the cooks.
14. In 62.5 percent schools there was a *pucca* kitchen shed. Out of 160 schools surveyed there are no kitchen sheds in 60 (37.5%) schools. Non availability of kitchen sheds was higher in Jhalawar district. In 49.4 percent schools storage facilities for food grains was available. This situation was prevailing mostly in all four districts. In 22.7 percent schools firewood was being used for cooking MDM while in 66.4 percent schools cooking gas was being used. In remaining 10.9 percent schools both sources were being used. The use of LPG was more in Jhalawar district. In 88.1 percent schools water was available for cooking cleaning and washing.

15. The participation of parents, VEC members and PRIs in monitoring and Supervision of MDM was reported in 53.7 percent schools. Roaster system was being maintained in only few schools.
16. Regular inspection of MDM was reported in only 53.7 percent schools. The DPO had also not carried out any inspection in 43.7 percent of the schools. No inspection of MDM has been carried out by the SPMU.
17. 26.3 percent schools teachers reported that the MDM had helped in improving the enrollment. 51.9 percent school teachers expressed that MDM had also helped in improving the attendance of children in schools. It had also helped in improving the general nutritional levels of children. The teachers in 93.1 percent schools reported that MDM had led to minimizing caste and gender divisions.

Consolidated Report

Mid Day Meal Scheme in Rajasthan

Introduction

The Mid day meal (MDM) scheme is being implemented in all 33 districts of Rajasthan since the year 2002. A cooked meal is being served to all children studying in Std. I-VIII in consonance with Supreme Court directives. As part of the SSA monitoring, the MDM scheme was covered in the following districts: Jaipur, Jhalawar, Kota and Sawai Madhopur.

General Information of Surveyed Schools

An effort was made to cover every block in the sample. 40 schools were selected in the each district. 3 Madarsas in Jaipur district, 4 Madarsas in Kota and 3 Madarsas in Sawai Madhopur were selected randomly. Thus a total of 160 elementary level schools were selected for the study. Out of these schools- 12 were urban PS, 20 were urban UPS, 71 were rural P.S and 57 were rural UPS. Table 1

Table 1: District wise number of school covered by type and locality of schools

Name of District	Urban Schools		Rural Schools		Total Schools
	Primary	Upper Primary	Primary	Upper Primary	
Jaipur	3 (7.5)	5 (12.5)	21 (52.5)	11 (27.5)	40 (100.0)
Jhalawar	2 (5.0)	6 (15.0)	16 (40.0)	16 (40.0)	40 (100.0)
Kota	3 (7.5)	5 (12.5)	18 (45.0)	14 (35.0)	40 (100.0)
S.Madhopur	4 (10.0)	4 (10.0)	16 (40.0)	16 (40.0)	40 (100.0)
Total	12 (7.5)	20 (12.5)	71 (44.4)	57 (35.6)	160 (100.0)

(1) Regularity in serving meal at school level

Out of the total 160 schools surveyed, the MDM was being served in all 153 schools on the day of the visit of the MI. In 7 schools MDM was not being served due to lack grains and non availability of cooks. In 138 schools MDM was being cooked in the school premises under the supervision of the SMC and in 22 schools MDM was being supplied by Centralised Kitchen (Akshay Patra). See Table 2 and 3.

Table 2: District wise number of Schools serving hot meal daily

Name of District	Yes	No	Total
Jaipur	35	5	40
Jhalawar	38	2	40
Kota	40	0	40
S.Madhapur	40	0	40
Total	153 (95.6)	7 (4.4)	160 (100.0)

Table 3: District wise number of school covered by type of MDM serving Institution

Interruption in MDM (Last twelve months)

Out of total schools surveyed, 94.4 percent schools reported that the MDM was served regularly in the past 12 months. In 5.6 percent schools there was an interruption in serving of MDM. The average number of the days MDM was disrupted ranged from 5-30 days, Table 4.

Table 4: District wise number of Schools reported interruption in Supplying MDM during last one year

Name of District	Yes	No	Total
Jaipur	4	36	40
Jhalawar	2	38	40
Kota	2	38	40
S.madhapur	1	39	40
Total	9 (5.6)	151 (94.4)	160 (100.0)

(Annexure-2. See list of schools reported interruption in MDM last 12 months)

Reason for interruption in supplying MDM

Out of total 160 schools surveyed, 9 (5.6 percent) schools reported that there was interruption in supply of MDM. District wise situation reveals that in Jaipur district NGO Akshay Patra in 3 schools not supplied MDM and in Jhalawar and Kota districts two schools in each district

reported irregular supply of food grain . In Jhalawar and Sawai Madhopur in one school each the MDM was interrupted due to non availability of cooking cost. Table 6

Table 6: District wise number of schools reported reason for interruption in supplying MDM

Name of District	Number of schools reported interruption	Reason for not supplying MDM				Total
		NGO/SHG not supplied	Lack of supply of food grains	Non availability of cook	Not supplying the cooking cost

Jhalawar	2		1		1	2
Kota	2		2			2
S.madhapur	1				1	1
Total	9 (5.6)	3 (33.3)	3 (33.3)	1 (11.1)	2 (22.3)	9 (100)

(2) Trends (Enrollment, attendance and number of children actual availing MDM)

In the 160 schools surveyed the total enrollment was 12660 (5782 boys and 6878 girls). The sex ratio in total enrollment was 46 boys and 54 girls. District wise enrollment in the surveyed schools indicates that enrollment was higher in Sawai Madhopur followed by Kota. The ratio of girls in enrollment was also found to be higher in Sawai Madhopur followed by Jhalawar and Jaipur.

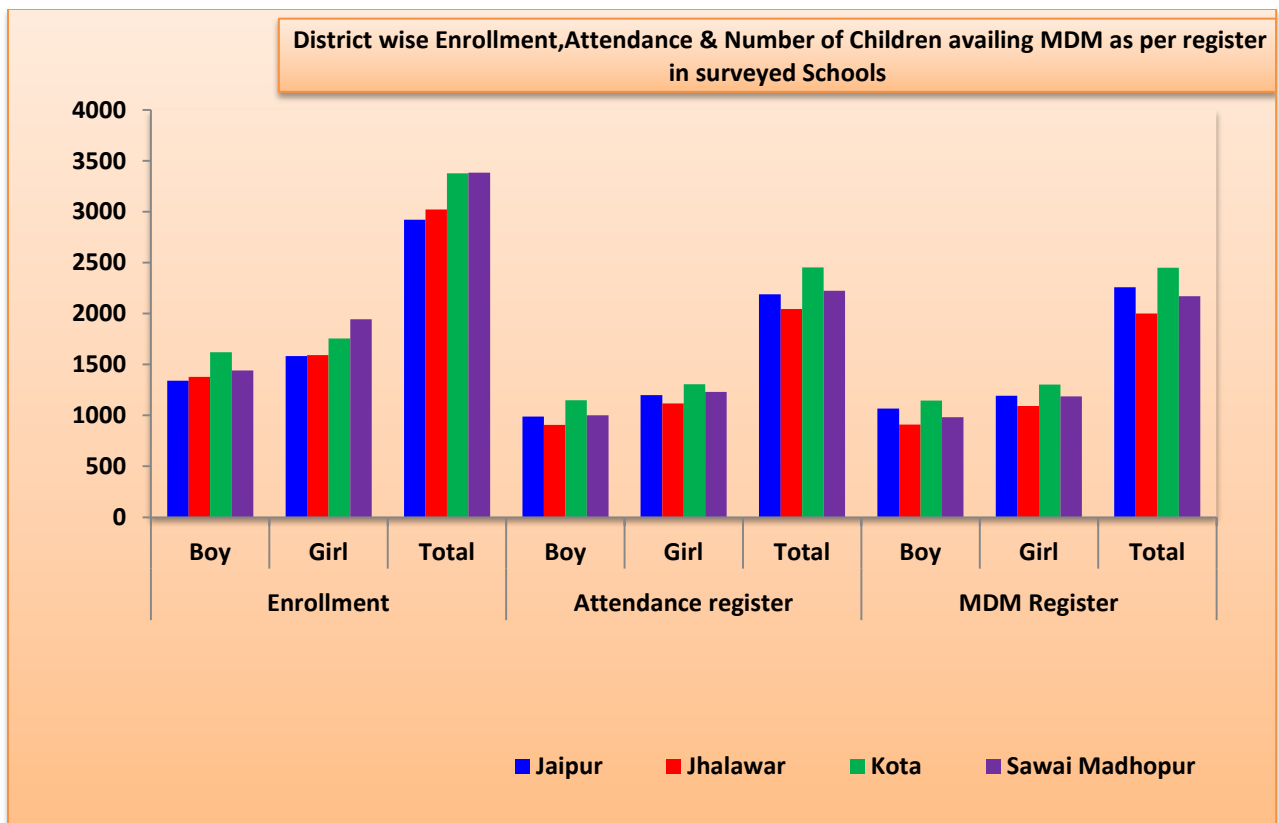

As per the attendance register, 70.3 percent children (69.9 percent boys and 70.6 percent girls) were present in the schools on the day of the visit of the MI. District wise data reveals that percentage of children's attendance was higher in Kota. The attendance of girls was higher in Jhalawar and district and lower in Kota district.

According to the MDM register, out of the total children enrolled, 69.5 percent children (69.3 percent boys and 69.6 percent girls) were availing MDM on the day of visit of the MI. The percentage of children availing the MDM was higher in Jaipur folloed byKota and lower in Sawai Madhopur district. Gender wise data reveals a higher percentage of girls are availing MDM in Kota.

Out of the total enrolment, 66.6 percent children (66.7 percent boys and 66.4 percent girls) were physically present and were availing of MDM. Districtwise percentage of physically present children was found higher in Kota (70.6 percent) and lower in Sawai Madhopur (61.1 percent). Table 7

S.Madhopur	1441	1944	3385	1003	1230	2233	984	1186	2170	938	1133	2071	931	1139	2070
Total	5782 (45.7)	6878 (54.3)	12660 (100)	4046 (45.4)	4857 (54.6)	8903 (100)	4026 (45.8)	4768 (54.2)	8794 (100)	3900 (45.9)	4591 (54.1)	8491 (100)	3858 (45.8)	4569 (54.2)	8427 (100)

(3) Regularity in delivering food grains to school level

It was found that 80.6 percent schools were receiving food grains on a regular basis. In 5.6 percent schools the supply was irregular. In 1.2 percent schools food grain was delivered within a month; 61.9 percent schools reported that the food grain is delivered between one to three months, while 23.1 percent schools reported that it took more than three months for the food grain to be supplied. In 13.8 percent schools MDM was supplied by Centralised Kitchen.

While there was no delay in 80.6 percent schools, 1.9 percent schools reported that the primary reason for delay in delivery of food grain was due to delay at FCI level. In 3.8 percent schools the delay was due to lack of transport facilities. In case of such delay food grain was borrowed from neighboring schools. It was reported that the delay in supplying the food grains is generally 1-3 months. In 13.8 percent schools MDM was supplied by Centralised Kitchen Table 8, 9, 10.

Table 8: District wise number of schools reporting regularity in delivery of food grains

Name of District	Yes	No	(MDM by Central Kitchen)	Total
Jaipur	18		22	40
Jhalawar	34	6		40

S.madhopur	38		2		40
Total	129 (80.6)	3 (1.9)	6 (3.8)	22 (13.8)	160 (100)

80.6 per cent schools reported that they had a buffer stock to deal with any situation of irregular supply while the remaining stated that they do not keep a buffer stock. District wise position shows that number of schools not having buffer stock is higher in Jhalawar followed by Sawai Madhopur districts. In 13.8 percent schools MDM was supplied by Centralised Kitchen. Table 11.

S.madhopur	37	3		40
Total	129 (80.6)	9 (5.6)	22 (13.8)	160 (100)

(Annexure-4. See list of schools reported not maintaining buffer stock)

The food grain was supplied at the school level in majority of schools. Out of total schools receiving food grain at school level, 81.5 percent had received the specified quantity of food grain. However, 18.5 per cent schools reported that they did not receive the specified quantity. The variation ranged between 2-5 kg per bag.

With respect to the quality of food grain supplied, 1.8 percent teachers reported that the quality of food grain was good, whereas 79.4 percent teachers reported that it was average. 5 percent teachers articulated that the quality of food grain was poor. District wise situation reveals that quality of grains was found to be poorer in Sawai Madhopur followed by Jaipur district Table 12.

Table 12: District wise schools reporting quality of food grains

Name of District	Quality of food grains			(MDM by Central Kitchen)	Total
	Good	Average	Poor		
Jaipur	1	15	2	22	40
Jhalawar	1	38	1		40
Kota		40			40
S.madhapur	1	34	5		40
Total	3 (1.8)	127 (79.4)	8 (5.0)	22 (13.8)	160 (100.0)

(4) Regularity in delivering cooking cost to schools

38.1 percent schools reported that they have been receiving cooking cost in advance while the remaining (48.1 percent) schools had not received cooking cost in advance. 43.7 percent schools reported a delay of 1 month to 4 months in receipt of cooking cost. In 4.4 percent schools there was a delay of more than four months in receiving the cooking cost. If we look at the district wise situation, we find that highest number of schools in Sawai Madhopur had not received cooking cost on time. In 13.8 percent schools MDM was supplied by Centralised Kitchen. Table 13 and 14

Table 13: Schools receiving cooking cost in advance

Total	61 (38.1)	70 (43.7)	7 (4.4)	22 (13.8)	160 (100.0)

The cooks are usually paid in cash and their honorarium has been increased to Rs. 1000. Majority of the cooks reported that the amount paid for cooking was not adequate, given the remuneration paid in the MNREGA and other development programs is higher.

(5) Social equity in MDM

It has been observed that when the MDM is served children often sit according to their own preference, either with children from their own gender or caste affiliation. Gender based segregation is more evident in UPS. In 20.0 percent schools children were found to be sitting according to their own choice. In 63.8 percent schools children were found to sitting in a line and taking MDM. In 16.2 percent schools children were found to be in groups according to sex. In 76.3 percent schools the MDM was being served by the cooks/helper. In 3.1 percent schools only girls were observed serving the MDM. Table 15.

Table 15: District wise seating and serving arrangement in schools

(6) Variety of Menu

A weekly menu for MDM has been specified by the State department. In 86.2 percent schools MDM was being prepared according to the prescribed menu. The number of schools not supplying MDM as per prescribed Menu was higher in Jaipur followed by Jhalawar district. Table 16.

The weekly menu was seen displayed in 34.4 percent schools. In 34 schools in Jhalawar and 26 schools in Jaipur the weekly menu had not been displayed on the board.

Table 16: District wise number of schools supplying MDM as per Menu and menu displayed on board

Name of District	Menu displayed on board			Supply as per menu		
	Yes	No	Total	Yes	No	Total
Jaipur	14	26	40	27	13	40
Jhalawar	6	34	40	35	5	40
Kota	16	24	40	37	3	40
S.madhopur	19	21	40	39	1	40
Total	55 (34.4)	105 (65.6)	160 (100.0)	138 (86.2)	22 (13.7)	160 (100.0)

(Annexure-6, 7-. See list of schools reported not supplying MDM as per Menu and Menu not displayed on board)

Reasons for not following Menu

In 22 schools the MDM was not being prepared according to the prescribed menu. In 2 schools, fruits and green vegetables had not been given due to non availability of fruits and vegetables in the village. The high prices of fruits were another reason cited by the teachers in 3 schools. In 18.2 percent schools it was observed that the HM/MDM in charge was indifferent and did not make any effort to purchase the fruits or other items. Table 17.

Table 17: Reasons for not following Menu Chart

Total	2 (9.1)	3 (13.6)	4 (18.2)	13 (59.1)	22 (100.0)

(7) Quantity and Quality of MDM

In 89.4 percent schools children reported that the MDM scheme was beneficial. Higher benefits of MDM have been reported in Jhalawar district. In 93.7 percent schools, children reported that they were satisfied with the quantity of MDM. Satisfaction level was found to be higher in Kota followed by Jhalawar with regard to quantity. 89.4 percent children expressed satisfaction with the quality of meal supplied. However in Jaipur district children

were not satisfied with the quality of meals provided. Out of 40 schools, there were 10 schools where children expressed dissatisfaction with the MDM, 5.9 percent schools reported they were dissatisfied because of non-inclusion of fruits and green vegetables; 29.4 percent schools reported that grain was not cleaned properly, 41.2 percent schools reported that cleanliness is not maintained and meals are not cooked properly by the appointed cooks and so on. In majority of schools of all districts surveyed schools raised the issue of low quality and irregularity of cooking cost. Table 18 and 19.

Some suggestions for improvement include- regular monitoring of MDM supplied by the schools, training on health and hygiene to MDM in charge and cooks and regular supervision by SMC members.

Table 18: Quality and Quantity of MDM

(8) Supplementary Nutrition

In 66.2 per cent schools, the school health program had been implemented by NRHM. Under this program a health check up is carried out of all the enrolled children by the health department. A health card is maintained and children are provided Iron, folic acid, vitamin -A dosage and de-worming medicines as per requirement. Majority of the schools reported that the health check is carried out once a year. Out of total surveyed schools no health checkup

had been conducted in 33.8 percent schools in last 12 months. In 74.4 percent schools a health register had been maintained Table 20.

(9) Status of cooks

Out of 160 schools surveyed cooking was being carried out in the school premises in 138 schools and in 22 schools MDM have been provided by Centralised Kitchen i.e. Akshay Patra. Cooks and helper had been appointed in 138 percent schools as per requirement. The average remuneration paid to the cooks and helpers is Rs.1000- per month. Only in 73.7 percent percent schools the cooks had been paid their remuneration on a regular basis. In 26.3 percent schools there was a delay in payment of remuneration. The delay ranged from 3-6 months. 94.9 percent schools reported that the cooks were paid in cash. In 5.1 percent school the payment was being made through a cheque. Table 22.

Table 22: Regularity of payment to cook and type of Payment

Caste and gender of cooks

In the 138 schools where cooking was being carried out in the school premises, there were 231 cooks (205 women and 26 men) had been appointed. Out of these 88.7 percent are women. The caste composition is as follows: 13.4 percent women and 0.9 percent men belongs to SC groups. 12.1 percent women and 3.0 percent men belong to ST group, about 51.2 percent women and 6.0 percent men belong to OBC groups. 5.6 percent women and 1.3 percent men belong to forward caste groups. There were no male and female cooks from minority groups. Caste wise situation reveals that highest number of women and men belong to OBC group. Table 23.

(10) Infrastructure facility for MDM scheme

Kitchen Sheds

In 62.5 percent schools there was a *pucca* kitchen shed. Out of 160 schools surveyed there were no kitchen sheds in 60(37.5%) schools. Out of these 60 schools in 22 schools the MDM was being supplied by Central Kitchen, in 10 schools the meal was being cooked in open place or tin shed in the school premises. In 7 schools the meal was being cooked at the residence of the cook and in 21 schools the meal was being cooked in the classroom. There

are no Pucca kitchen sheds in 18 schools of Jhalawar, 12 schools of Kota and 8 schools of Sawai Madhopur district. Table 24

Table 24: Availability of pucca Kitchen shed in surveyed schools

(Annexure-14-. See list of schools reported not available Pucca kitchen Sheds.)

Storage Facility

In 49.4 percent schools storage facilities for food grains was available. In the remaining 50.6 percent schools storage facility had been sanctioned and in some it was under construction. In majority of schools food grain was being stored in the classrooms in gunny bags and drums. This situation was prevailing mostly in all districts. Table 25.

Table 25: Availability of pucca store facility in surveyed schools

(Annexure-15-. See list of schools not available pucca store facility.)

Availability of Water

In 88 percent schools sufficient water was available for the purpose of cooking, drinking and washing. However in Sawai Madhopur availability of water continues to be a problem. In majority of schools measures were taken to conserve water while washing utensils. Table 26

Availability of Utensils

In 95 percent schools utensils for cooking and serving were available. In Jaipur there were 3 schools which reported non availability of sufficient utensils.

Availability of Cooking Gas/fuel wood

In 22.7 percent schools firewood was being used for cooking MDM and in 66.4 percent schools cooking gas was being used. In remaining 10.9 percent schools both sources were being used. The use of LPG was more in Jhalawar district. Table 26

Table 26: Availability of sufficient water for MDM and fuel used in surveyed schools

(12) Community Participation

Daily supervision of MDM

The participation of parents, SMDC members and PRIs in monthly monitoring and Supervision of MDM was reported in 53.7 percent schools. No contributions in cash have been made in the schools. Roaster system was being maintained in some schools.

Teachers and parents in majority of primary and upper primary schools reported that they were satisfied with quantity and quality of MDM served. Table 28.

In most schools parents were aware that MDM is being distributed to children, but they were not aware of the nutritional value of the MDM distributed to the children. The main source of information regarding MDM was the teacher and students.

Table 28: General awareness about the quantity and quality of MDM in PS and UPS schools

(13) Inspection and Supervision of MDM by State, District and Block Officials

Only 53.7 percent schools reported that there was a regular inspection of MDM. Only few schools had been carried out by the SPMU. The DPO had carried out inspection in 43.7 percent of the schools. The BEEO/RP and other block officers had mostly carried out monthly and quarterly inspection of the MDM. Table 29, 30, 31.

(14) Impact of MDM

In 26.3 schools teachers were of the view that the MDM had helped in improving the enrollment. 51.9 percent school teachers expressed that MDM had led to improvement in the attendance of children in schools; 68.1 percent teachers pointed that it had helped in improving the nutritional levels of children in schools. 93.1 percent teachers reported that MDM had also led to minimizing caste and gender differences. 58.1 percent school teachers felt that MDM had created an educational environment in schools. The incidental benefits were reported in 21.9 percent schools and included regularity, the siblings who accompany the older children also benefit. Table 32.

Conclusion

In most of the schools surveyed, Midday meal was being distributed with fair regularity. Most teachers and parents reported that they were satisfied with the quantity and quality of MDM in the surveyed districts. The regularity of supply of food grains and quality related issues needs to be closely monitored. Emphasis also needs to be given to issues related to hygiene. In all schools of four districts greater monitoring in delivery of MDM is a felt need.

First Half Yearly Monitoring Report of MDM in Rajasthan

1st April to 30th September, 2014

District Summary

<p>District 1: Jaipur</p>	<p>A. General information of sample schools</p> <p>For the present study an effort was made to cover every block in the sample. 40 schools were selected randomly in Jaipur district. Out of these schools- 3 were urban PS, 5 were urban UPS, 21 were rural PS and 11 were rural UPS.</p> <p>B. Regularity in serving MDM:</p> <p>On the day of the visit of the MI, cooked MDM was being served in all 40 schools. Out of the total 40 schools surveyed, in 18 schools the MDM was being cooked in the school premises under the supervision of the SMC and in 22 schools MDM was being served by centralized Kitchen i.e Akshay Patra. Only in 4 schools the MDM was disrupted for 5-15 days.</p> <p>C. Trends in Enrollment, Attendance and number of children availing MDM</p> <p>The total enrollment in the surveyed schools was 2924(1341 boys and 1583 girls). As per the attendance register 74.9 percent children (73.7 percent boys and 75.7 percent girls) were present in the schools on the day of the visit of the MI. According to the MDM register, out of the total children enrolled 74.3 percent children (73.5percent boys and 75.9 percent girls) were availing MDM on the day of the visit. On the basis of head count the MI found that out of the total enrolment 70.5 percent children (70.5 percent boys and 69.7 percent girls) were physically present and were availing of MDM.</p> <p>D. Regularity in delivering food grains to school</p> <p>It was found that all 18 schools were receiving food grains on a regular basis. In all surveyed schools food grain was not delivered within a month; 32.5 percent schools reported that the food grain is delivered between one to three months, while 12.5 percent schools reported that it took more than three months for the food grain to be supplied. There was no delay reported in delivering food grain to schools surveyed. In case of any delays the food grain</p>
---	--

was borrowed from neighboring schools. 100.0 per cent schools reported that they had a buffer stock to deal with any situation of irregular supply.

About 50 percent schools had received the specified quantity of food grain. However, 50 per cent schools reported that they received lesser quantities than specified. The variation ranges between 2-5 kg per bag. The food grain was supplied at the school level in majority schools.

With respect to the quality of food grain supplied 2.5 percent teachers reported that the quality of food grain supplied was good, whereas 37.5 percent teachers reported that it's was average and 5 percent teachers articulated that the quality of food grain was poor. In 22(55 percent) schools MDM is being supplied by Centralised Kitchen (Akshay Patra)

E. Regularity in delivering cooking cost to school

20 percent schools reported that they have been receiving cooking cost in advance while the remaining 25 percent were not found to be receiving cooking cost in advance. Delay in receiving cooking cost ranged from 1 month to 5 months. In such situations the teachers often borrow cooking materials /spices from the neighboring shopkeepers. The main reason of delay in delivering cooking cost includes delays in transferring money from the district and block level into SMC account.

The cooks are usually paid in cash and their honorarium has been increased to Rs. 1000. Majority of the cooks reported that the amount paid for cooking was not adequate, given the remuneration paid in the MNREGA and other development programmes.

F. Social equity

In 25 percent schools it was observed that children sit anywhere according to their own choice for the MDM. In 52.5 Percent schools childrens sit in a line and in 22.5 percent schools children sit according to sex groups specially in UPS schools. No discriminatory pattern was observed with regard to serving of MDM. All caste group children, both boys and girls were seen to be serving food in these schools. In 60.5 percent school the gender divide was clearly visible and girls were made to serve the food. In 55 percent schools

the cook/helper was serving the MDM.

No overt discrimination related to religion caste and gender was observed in majority of the schools covered in the sample.

G. Variety of Menu

The State department has specified the weekly menu for MDM. In 67.5 percent schools MDM was being prepared according to the pre decided menu. In the schools the Menu was decided by the local SMC and State Government.

In 35 percent of the schools visited by the MI, the weekly menu was seen displayed in the school premises. The MDM logo was not displayed in any school.

A variety is being ensured in most schools. Generally fruits, rice, dal and green vegetables have been included in the menu. However in 32.5 percent schools it was reported that fruits and green vegetables are not included in the menu where the MDM is being supplied by Centralised Kitchen. The reasons cited for not including these items in the menu are: non-availability of fruits and green vegetables in remote villages and high prices of fruits. In some cases it was observed that the MDM in charge is indifferent and does not purchase the fruits.

H. Quantity and Quality of MDM

In 72.5 percent schools parents reported that the MDM scheme was beneficial.

In 87.5 percent schools, children reported that they were satisfied with the quantity of MDM. 75 percent expressed satisfaction with the quality of meal supplied. In the remaining schools children expressed dissatisfaction with the MDM supplied. The reasons for not being satisfied include non-inclusion of fruits and green vegetables; grain was not cleaned properly and food not cooked properly.

I. Supplementary Nutrition

According to 85 percent schools, the school health programme is

implemented by NRHM. Under this programme a health check up is carried out of all the enrolled children by the ANM. A health card is maintained and children are provided Iron, folic acid, vitamin -A dosage and de-worming medicines as per requirement. In the surveyed schools it was found that only 85 Percent schools had maintained a health register. Majority of the schools reported that the health check is carried out once a year. In 15 percent schools, no health check up has been carried out.

In 87.5 percent schools it was reported that they had received the necessary nutrition supplements from NRHM. In 12.5 percent schools no supplements have been provided to the children.

Some suggestions include regular monitoring of health check up, maintenance of records of health check, follow up to be ensured.

J. Status of Cooks

In all 18 schools where cooking is being carried out in the school premises, the cooks have been appointed by the SMC. In all the surveyed schools cooks and helper were available as per requirement. The average remuneration paid to the cooks and helpers ranges from Rs.1000- Rs. 1200.

As per MDM norms the cooks are paid a remuneration of Rs. 1000. However in some cases where the required number of cooks has not been appointed the cooks/helper is paid more.

In only 11(28.5 percent) schools the cooks were paid their remuneration regularly. In the remaining schools there was a delay in payment of remuneration. The delay ranged from 3- 6 months.

All schools reported that the cooks were paid in cash

In the 18 school surveyed was MDM is supplied by SMC there were 32 cooks (32 women) working in MDM. The caste composition was as followsz 12.5 percent women belongs to SC group, 65.6 percent belonged to OBC groups, 6.2 percent women belonged to General caste and 15.6 percent women belongs to minority groups. There is no single man from SC, ST,OBC, general and minority caste groups working as cook.

K. Infrastructure

Kitchen Sheds

In all 18(45 percent of surveyed) schools where the MDM was being prepared in the school premises had a *pucca* kitchen shed. In schools where there were no kitchen sheds meals were being cooked in the classrooms, at the residence of the cook or in the tin shed in the school premises.

The kitchen sheds had been constructed under various development programmes including SSA.

Storage Facility

In 9 schools out of 18 schools surveyed storage facilities for food grains was available. In the remaining schools storage facility had been not sanctioned and in some it was under construction. In these schools food grain was being stored in the classrooms in gunny bags and drums.

Water

In 82.5 percent schools sufficient water was available for the purpose of cooking, drinking and washing.

Utensils

In majority schools (82.5 percent) schools utensils for cooking and serving were available.

Cooking Gas/fuel wood

In 5 schools out of 18 schools surveyed cooking gas was being used for preparing MDM. In 10 schools firewood was being used for cooking MDM and in remaining 3 schools both was being used.

L. Safety and Hygiene

87.5 percent school teachers reported that safety measures were taken while cooking MDM. According to 87.5 percent teacher's hygiene practices were promoted in the schools and children washed their hands before and after meals. 87.5 percent teachers said that cleanliness is maintained in the schools. However, in 15 percent schools, teachers reported that discipline was

poor in the school during distribution of MDM. In majority schools measures were taken to conserve water while washing utensils.

M. Community Participation

The participation of parents, VEC members and PRIs in monitoring and Supervision of MDM was only reported in 50.0 percent schools. No contributions in cash have been made in the schools. In 8 percent schools roaster system was being maintained.. Teachers and parents in majority of primary and upper primary schools reported that they were satisfied with quantity and quality of MDM served. However in 10.0 percent schools teachers and parents stated that the quality of MDM was poor.

In most schools parents were aware that MDM is being distributed to children in schools but they were not aware of the nutritional value of the MDM distributed to the children. The main source of information regarding MDM was the teacher and students.

N. Inspection and Supervision

It was reported in 40 percent schools that there was a regular inspection of MDM. No inspection of MDM has been carried out by the SPMU. The DPO had also not carried out any inspection in 50.0 percent of schools. The BRC/CRC and other block officers carried out quarterly and half yearly inspection of the MDM.

O. Impact

According to 15.0 percent schools teachers the MDM had helped in improving the enrollment and attendance of children in schools. It had also helped in improving the general nutritional levels of children. The teachers in 92.5 percent schools reported that MDM had led to minimizing caste and gender divides and also created an educational environment in schools. The incidental benefits were reported in 30 percent schools and include regularity, the siblings who accompany the older children also benefit

MDM in Madarsas : District Jaipur

There are a total of 377 Madarsas registered in district Jaipur. There are a total of 854 para teachers working in the Madarsas. A total of 38571 students are enrolled in these Madarsas.

Three Madarsas were covered during the Monitoring.

- Madaarsa Hiyatul Islam Girls school, Bhata Basti, Shastri Nagar
- Madarsa Fajane Garib Nawaz, Koresian, Sanjay Nagar Bhata Basti
- Madarsa Fajane Garib Nawaz, Koresian, Sanjay Nagar Bhata Basti

The MDM Logo was displayed in all three Madarsas, but the menu was not displayed.

A total of 5275 children had availed MDM in the past one month. The MDM was being supplied by Akshay Patra in all three Madarsas.

The enrolment in the Madarsas was

Name of Madarsa	Enrollment B+G=T	Attendance B+G=T	No. of children availing MDM B+G=T
• Madaarsa Hiyatul Islam Girls school, Bhata Basti, Shastri Nagar	67+77=144	43+45=87	43+45=87
• Madarsa Fajane Garib Nawaz, Koresian, Sanjay NAGAR Bhatta Basti	79+89=168	24+36=60	20+30=50
• Madarsa Fajane Garib Nawaz, Koresian, Sanjay NAGAR Bhatta Basti	124+111=235	101+87=188	90+80=170

Social Equity: It was observed that all the children were eating the MDM . Only girls were serving the MDM.

The MDM was served in accordance to the prescribed Menu. However, no fruits had been served to the children. Instead biscuits had been distributed once a week.

Quantity and Quality of MDM: Most parents and children were satisfied with the quantity and quality of food served. However teachers complained that the rotis were often hard and sometimes there were insects found in the food.

No health check up had been carried out in the Madarsas.

Akshay Patra had also supplied Water cans in the madarsas.

Storage space was not available in any of the Madarsas.

Toilets were available in the Madarsas but were dirty and not maintained.

Computers were available in only one Madarsa.

The team was informed that community members come and check the MDM once or twice during the week.

The supervision is mainly carried out by the BEEO /community members. No official from the district or the State had visited these Madarsas.

Mid Day Meal supply by Central Kitchen: Akshya Patra Foundation

Out of total 40 schools surveyed in Jaipur district, MDM in 22 schools of block Phagi and Jaipur city was being supplied by Cetral Kitchen- Akshya Patra. The AKSHYA PATRA Foundation is supplying MDM through its centralised kitchen located in Jagatpura in Jaipur since ----. The Centralised kitchen is located on Goner road and is spread over a large area. The surroundings are clean and it is easily accessible.

The foundation supplies MDM to 1300 government primary schools, 294 ICDS centres and 42 Akshay kaleva kendras and 1 residential Madarsa in Jaipur. The radius in which the MDM is supplied ranges around 10 km to 85 km.

The premises where the MDM is prepared is clean and there is adequate space for storage of foodgrain and other raw material. Preparation is carried out in a 10x10 sq. feet room and there are both dry and wet areas where cooking is carried out. The assembling and packaging also takes place in specified areas. There is a separate washing area. All the rooms were observed to be clean.

The procurement and storage of food items is carried out on a regular basis 700 kg of food grain is purchased at one time. These are stored in jute and plastic gunny bags. 50 kg. Pulses and 1800 litres of oil is procured every quarter; and 500kg of vegetables is procured on a daily basis. All the raw ingredients are thoroughly cleaned and stored before usage. They are placed on the floor as there is no raised platform. The food items are cleaned thoroughly before preparation.

	<p>There is adequate supply of water through tap, availability and storage of water in the premises. .</p> <p>The MDM is prepared auto machines and on LPG. The total time taken for preparing the food is around 3 hours. The time lapse between preparation and packing is around 1 hour. The chapattis are made by an automated machine. The food items are kept in stainless containers- dols and patilas and later transferred to tiffin carriers.</p> <p>The MDM is prepared between 4 a.m to 8.a.m. and supplied to the various schools by 10a.m.</p> <p>Though the total costs per child are around RS.8.50 the Foundation receives a sum of Rs. 3.50 paise per child. The food grain is supplied by the government at a subsidised rate of Rs. 2 per kg. The process of cleaning and preparing the flour is carried out by the Foundation.</p> <p>The schools reported that the leftover food is thrown or sometimes sent back to the supplier.</p> <p>Organisational Chart</p> <p>Fifty percent of the staff is permanent and 50 percent contractual. There is a Kitchen incharge and an assistant kitchen incharge. A store and purchase incharge are also appointed. There are 2 head cooks, 8 cooks and 135 handlers appointed by the foundation.</p> <p>All the staff was well groomed and were wearing headgears and gloves while handling food.</p> <p>Garbage bins were also kept for waste disposal. The food is transported to the schools vans and there is a person accompanying the packed food.</p>
<p>District 2: Jhalawar</p>	<p>A. General information of sample schools</p> <p>For the present study, an effort was made to cover every block in the sample. 40 schools were selected randomly in Jhalawar district. Out of these schools- 2 were urban PS, 6 were urban UPS, 16 were rural P.S and 16 were rural UPS. Special focus in this district was given to schools with high gender gap, drop out, migration and those which were prone to natural calamities.</p> <p>B. Regularity in serving MDM:</p> <p>On the day of the visit of the MI, cooked MDM was being served in all the schools. Out of the total 40 schools surveyed the MDM was being cooked in</p>

the school premises under the supervision of the SMC.

While 95 percent schools reported that the MDM was being served regularly in the past 12 months, 5 percent schools reported that there was an interruption in serving of MDM. The average number of the days MDM was disrupted ranged from 8-15 days. The reasons for disruption included irregular supply of food grain, non-receipt of cooking cost on time and non-availability of cook.

C. Trends in Enrollment, Attendance and number of children availing MDM

The total enrollment in the surveyed schools was 2972 (46.4 percent boys and 53.6 percent girls). As per the attendance register 68.2 percent children (65.8 percent and 70.2 percent girls) were present in the schools on the day of the visit of the MI. According to the MDM register, out of the total children enrolled 67.4 percent children (66.0 percent boys and 68.5 percent girls) were availing MDM on the day of the visit. On the basis of head count the MI found that out of the total enrolment 64.7 percent children (63.6 percent boys and 65.6 percent girls) were physically present and were availing of MDM.

D. Regularity in delivering food grains to school

85 percent schools were receiving food grains on a regular basis. In the remaining 15 percent schools the supply was irregular. In 5 percent schools reported that the foodgrain is delivered within one month; 75 percent schools reported that the foodgrain is delivered between one to three months, while 20 percent schools reported that it took more than three months for food grain to be supplied.

In case of such delays the food grain is borrowed from neighboring schools. 87.5 per cent schools reported that they had a buffer stock to deal with any situation of irregular supply. The remaining schools stated that they do not keep a buffer stock.

75.0 percent schools had received the specified quantity of foodgrain, whereas 25.0 percent reported that lesser quantities than specified. The variation ranges between 2-5 kg per bag.

The quality of food grain was reported to be good only in 2.5 percent schools

whereas 95 percent teachers reported that it's was average, and in 2.5 percent schools teachers articulated that the quality of food grain was poor.

E. Regularity in delivering cooking cost to school

55 percent schools reported that they have been receiving cooking cost in advance while 45 percent were not found to be receiving cooking cost in advance. Delay in receiving cooking cost ranged from 1 month to 5 months. As in other districts, the teachers often tend to borrow cooking materials /spices from the neighboring shopkeepers. The main reason of delay in delivering cooking cost includes delays in transferring money from the district and block level into SMC account.

In majority of the schools the cooks are paid in cash. In majority of the surveyed schools cooks complained that the amount paid for cooking was not adequate.

F. Social equity

In most schools it was observed that children were made to sit in a line (with or without a dari patti) for the MDM (77.5 percent schools had this arrangement).In no any schools children were found to be sitting in groups according to their caste identity. In 5 percent schools children were sitting in gender groups specially in UPS schools.

In schools no discriminatory pattern was observed with regard to serving of MDM. All caste group children, both boys and girls were seen to be serving food in these schools. However in 2.5 percent school the gender divide was clearly visible and girls were made to serve the food. In 77.5 percent school the cook/helper was serving the MDM.

No overt discrimination related to religion caste and gender was observed in majority of the schools covered in the sample.

G. Variety of Menu

In all 87.5 percent schools MDM was being prepared according to the weekly menu decided by the State. In the remaining schools the Menu was decided by the local SMC.

In all the schools visited by the MI the MDM logo was not displayed in any

school but in 15 percent of the schools the weekly menu was not displayed in the school premises. A variety is being ensured in most schools. Generally fruits, rice, dal and green vegetables have been included in the menu. However in 7.5 percent schools it was reported that fruits and green vegetables are not included in the menu. The reasons cited for not including these items in the menu are: non-availability of fruits and green vegetables in remote villages and high prices of fruits. In some cases it was observed that the MDM in charge is indifferent and does not purchase the fruits.

H. Quality and Quantity of MDM

In 97.5 percent schools children reported that the MDM scheme was good and beneficial.

In 95 percent schools children reported that they were satisfied with the quantity and in 95 percent schools were satisfied with quality of MDM supplied. In the remaining schools children expressed dissatisfaction with the MDM supplied. The main reason was non-inclusion of fruits and green vegetables in menu.

Some suggestions for improvement include- regular supervision by SMC members, training on health and hygiene to MDM in charge.

I. Supplementary Nutrition

The school health programme implemented by SSA/NRHM is functioning in the district. 52.5 percent schools reported that it was being implemented in their schools. Under this programme a health check up is carried out of all the enrolled children by the ANM. A health card is maintained and children are provided Iron, folic acid, vitamin -A dosage and de-worming medicines as per requirement. In the surveyed schools it was found that only 65 percent schools had maintained a health register. Majority of the schools reported that the health check up is carried out on a yearly basis.

In 62.5 percent schools it was reported nutrition supplements had been provided to the children on a regular basis. In the remaining school the supply was irregular.

Some suggestions include: regular monitoring of health check up, maintenance of records of health check, follow up of children who are found

with health problems/difficulties should be ensured.

J. Status of Cooks

In 40 surveyed schools where cooking is being carried out in the school premises, the cooks have been appointed by the SMC. In all surveyed schools cooks and helper were available as per requirement. The average remuneration paid to the cooks and helpers ranges from Rs.1000 per month. As per MDM norms the cooks are paid a remuneration of Rs. 1000. However in some cases where the required number of cooks has not been appointed the cooks/helper is paid more.

In only 90 percent schools the cooks were paid their remuneration regularly. In the remaining schools there was a delay in payment of remuneration. The delay ranged from 3- 6 months.

100 percent schools reported that the cooks were paid in cash.

In the 40 school surveyed was MDM is supplied by SMC there were 62 cooks (50 women and 12 men) working in MDM. The caste composition was as Follows: 12.9 percent women belongs to SC group 16.1 percent women and 6.4 percent men belong to ST and 46.8 percent women and 11.3 percent men belong to OBC groups. 4.8 percent women and 1.6 percent men belong to General caste group. There is no single men is working as cook from SC and Minority caste groups.

K. Infrastructure

Kitchen Sheds

In 55 percent schools there were pucca kitchen sheds. In the remaining schools two situations prevailed either there were no kitchen sheds (18 schools) or the kitchen sheds were not usable.

The kitchen sheds had been constructed under various development schemes including SSA.

There should be an assessment of the construction of kitchen cum store. It was observed that due to poor quality of construction the kitchen cannot be used properly.

Storage Facility

Storage facilities for food grains were available in 62.5 percent schools. In the

remaining schools storage facility had been sanctioned and in some it was under construction. .

In these schools food grain was being stored in the classrooms or HM room in gunny bags.

Water

In 95 percent schools water was available for the purpose of cooking, drinking and washing. The sources included hand pump and tank.

Utensils

Utensils for cooking and serving were available in 90 percent schools.

Cooking Gas/fuelwood

In the 7.5 percent schools firewood is used for cooking MDM. In the 92.5 percent schools are using LP gas while not a single school among the surveyed schools are using both gas and firewood.

L. Safety and Hygiene

Only in 87.5 percent schools teachers reported that safety measures were taken while cooking MDM. Hygienic practices (like washing hands before meals) were reported in 87.5 percent schools. Cleanliness is not maintained properly in 25 percent schools. Teachers of 10 percent schools reported that discipline was poor in the school during distribution of MDM. In majority schools teachers reported that they took adequate measures to conserve water while washing utensils.

M. Community Participation

The participation of parents, VEC members and PRIs and monitoring and Supervision of MDM was reported only in majority of schools. Teachers and parents in majority of primary and upper primary schools reported that they were satisfied with quantity of MDM served. However in 5 percent schools teachers and parents stated that the quantity of MDM was poor.

The parents were however, not aware of the nutritional value of the MDM distributed to the children.

N. Inspection and Supervision

	<p>Regular inspection of MDM was reported in all the surveyed schools. No inspection of MDM has been carried out by the SPMU. The DPO had not visited 52.5 percent schools. The BRC/CRC and other block officers carried out quarterly inspection of the MDM in 92.5 percent schools</p> <p>O. Impact</p> <p>According to teachers in 35 percent schools the MDM had helped in improving the enrollment and 52.5 percent school teachers reported incensement in attendance of children in schools and 75 percent had also helped in improving the general nutritional levels of children. The teachers in only 90 percent schools reported that MDM had led to minimizing caste and gender divides. The incidental benefits were reported in 17.5 percent schools and include regularity, exposure of the siblings who accompany the older children to an educational environment.</p>
<p>District 3: Kota</p>	<p>A. General information of sample schools</p> <p>For the present study an effort was made to cover every block in the sample. 40 schools were selected randomly in Kota district. Out of these schools- 3 were urban PS, 5 were urban UPS, 18 were rural PS and 14 were rural UPS.</p> <p>B. Regularity in serving MDM:</p> <p>On the day of the visit of the MI, cooked MDM was being served in all 40 schools. Out of the total 40 schools surveyed, in all the surveyed schools the MDM was being cooked in the school premises under the supervision of the SMC; only in 2 schools the MDM was disrupted for 1-45 days.</p> <p>C. Trends in Enrollment, Attendance and number of children availing MDM</p> <p>The total enrollment in the surveyed schools was 3379(1622 boys and 1757 girls). As per the attendance register 72.6 percent children (70.8 percent boys and 74.4 percent girls) were present in the schools on the day of the visit of the MI. According to the MDM register, out of the total children enrolled 72.5 percent children (70.6 percent boys and 74.2 percent girls) were availing MDM on the day of the visit. On the basis of head count the MI found that out of the total enrolment 70.6 percent children (68.1 percent boys and 72.9</p>

percent girls) were physically present and were availing of MDM.

D. Regularity in delivering food grains to school

It was found that 97.5 percent schools were receiving food grains on a regular basis. In 2.5 per cent schools the supply was irregular. In 70 percent schools reported that the food grain is delivered between one to three months, while 30 percent schools reported that it took more than three months for the food grain to be supplied. The primary reason for delay in delivery of food grain in schools was due to delay at FCI level and lack of transport facilities. In case of such delays the food grain was borrowed from neighboring schools. 97.5 percent schools reported that they had a buffer stock to deal with any situation of irregular supply while the remaining stated that they do not keep a buffer stock.

About 45 schools had received the specified quantity of food grain. However, 55 per cent schools reported that they received lesser quantities than specified. The variation ranges between 2-5 kg per bag. The food grain was supplied at the school level in majority schools.

With respect to the quality of food grain supplied teachers reported that it's was average..

E. Regularity in delivering cooking cost to school

60 percent schools reported that they have been receiving cooking cost in advance while the remaining 40 percent were not found to be receiving cooking cost in advance. Delay in receiving cooking cost ranged from 1 month to 5 months. In such situations the teachers often borrow cooking materials /spices from the neighboring shopkeepers. The main reason of delay in delivering cooking cost includes delays in transferring money from the district and block level into SMC account.

The cooks are usually paid in cash and their honorarium has been increased to Rs. 1000. Majority of the cooks reported that the amount paid for cooking was not adequate, given the remuneration paid in the MNREGA and other development programmes.

F. Social equity

In 17.5 percent schools it was observed that children sat anywhere according

to their own choice for the MDM. In 65 Percent schools children sit in line and take MDM in a disciplinary manner. No discriminatory pattern was observed with regard to serving of MDM. All caste group children, both boys and girls were seen to be serving food in these schools. In 82.5 percent schools the cook/helper was serving the MDM.

No overt discrimination related to religion caste and gender was observed in majority of the schools covered in the sample.

G. Variety of Menu

The State department has specified the weekly menu for MDM. In 92.5 percent schools MDM was being prepared according to the pre decided menu. In the schools the Menu was decided by the local SMC.

In 40 percent of the schools visited by the MI, the weekly menu was seen displayed in the school premises. The MDM logo was not displayed in any school.

A variety is being ensured in most schools. Generally fruits, rice, dal and green vegetables have been included in the menu. However in 2.5 percent schools it was reported that fruits and green vegetables are not included in the menu. The reasons cited for not including these items in the menu are: non-availability of fruits and green vegetables in remote villages and high prices of fruits. In 5 percent schools it was observed that the MDM in charge is indifferent and does not purchase the fruits.

H. Quantity and Quality of MDM

In 95 percent schools parents reported that the MDM scheme was beneficial.

In all the schools, children reported that they were satisfied with the quantity of MDM. 95 percent expressed satisfaction with the quality of meal supplied. In the remaining schools children expressed dissatisfaction with the MDM supplied. The reasons for not being satisfied include non-inclusion of fruits and green vegetables; grain was not cleaned properly and food not cooked properly.

I. Supplementary Nutrition

According to 67.5 percent schools, the school health programme is implemented by NRHM. Under this programme a health check up is carried out of all the enrolled children by the ANM. A health card is maintained and children are provided Iron, folic acid, vitamin -A dosage and de-worming medicines as per requirement. In the surveyed schools it was found that only 77.5 Percent schools had maintained a health register. Majority of the schools reported that the health check is carried out once a year. In 32.5 percent schools, no health check up has been carried out.

In 52.5 percent schools it was reported that they had received the necessary nutrition supplements from NRHM. In 47.5 percent schools no supplements have been provided to the children.

Some suggestions include regular monitoring of health check up, maintenance of records of health check, follow up to be ensured.

J. Status of Cooks

In all surveyed schools where cooking is being carried out in the school premises, the cooks have been appointed by the SMC. In all the surveyed schools cooks and helper were available as per requirement. The average remuneration paid to the cooks and helpers ranges from Rs.1000- Rs. 1200.

As per MDM norms the cooks are paid a remuneration of Rs. 1000. However in some cases where the required number of cooks has not been appointed the cooks/helper is paid more.

In only 75 percent schools the cooks were paid their remuneration regularly. In the remaining schools there was a delay in payment of remuneration. The delay ranged from 3- 6 months.

97.5 percent schools reported that the cooks were paid in cash

In the 40 school surveyed was MDM is supplied by SMC there were 65 cooks (61 women and 4 men) working in MDM. The caste composition was as follows: 9.2 percent women and 1.5 percent men belongs to SC group, 15.3 percent women and 1.5 men belongs to ST group, 60 percent women and 3.1 percent men belonged to OBC groups, 7.7 percent women belonged to General caste, and 1.6 percent women belongs to minority groups. There is no single man from general and minority caste groups working as cook.

K. Infrastructure

Kitchen Sheds

In the schools where the MDM was being prepared in the school premises 70 percent schools had a *pucca* kitchen shed. In schools where there were no kitchen sheds meals were being cooked in the classrooms, at the residence of the cook or in the tin shed in the school premises.

The kitchen sheds had been constructed under various development programmes including SSA.

Storage Facility

In 55 percent schools storage facilities for food grains was available. In the remaining schools storage facility had been not sanctioned and in some it was under construction. In these schools food grain was being stored in the classrooms in gunny bags and drums.

Water

In 95 percent schools sufficient water was available for the purpose of cooking, drinking and washing.

Utensils

In majority schools (82.5 percent) schools utensils for cooking and serving were available.

Cooking Gas/fuel wood

In 70 percent schools cooking gas was being used for preparing MDM. In 17.5 percent schools firewood was being used for cooking MDM and in remaining 12.5 percent schools both were being used.

L. Safety and Hygiene

In all schools teachers reported that safety measures were taken while cooking MDM. According to majority of teacher's hygiene practices were promoted in the schools and children washed their hands before and after meals. 95 percent teachers said that cleanliness is maintained in the schools. However, in 10 percent schools, teachers reported that discipline was poor in the school during distribution of MDM. In majority schools measures were taken to

conserve water while washing utensils.

M. Community Participation

The participation of parents, VEC members and PRIs in monitoring and Supervision of MDM was only reported in 50.0 percent schools. No contributions in cash have been made in the schools. In some schools roaster system was being maintained.. Teachers and parents in majority of primary and upper primary schools reported that they were satisfied with quantity and quality of MDM served. However in some schools teachers and parents stated that the quality of MDM was poor.

In most schools parents were aware that MDM is being distributed to children in schools but they were not aware of the nutritional value of the MDM distributed to the children. The main source of information regarding MDM was the teacher and students.

N. Inspection and Supervision

It was reported in 40 percent schools that there was a regular inspection of MDM. No inspection of MDM has been carried out by the SPMU. The DPO had also not carried out any inspection in 57.5 percent of schools. The BRC/CRC and other block officers carried out quarterly and half yearly inspection of the MDM.

O. Impact

According to 22.5 percent schools teachers the MDM had helped in improving the enrollment and attendance of children in schools. It had also helped in improving the general nutritional levels of children. The teachers in 95 percent schools reported that MDM had led to minimizing caste and gender divides and also created an educational environment in schools. The incidental benefits were reported in 27.5 percent schools and include regularity, the siblings who accompany the older children also bene

MDM in Madarsas : District Kota:

MDM is being served in 89 Madarsas in Kota district. Initially Naandi Foundation used to supply the MDM but it was discontinued and it is now

being prepared and served in the Madarsas.

Four Madarsas were covered during the Monitoring visits.

The logo had not been displayed in any of the four Madarsas. The teachers did not have the information about the logo.

All the Madarsas had displayed the menu.

All the Madarsas were serving the MDM on a regular basis but one Madarsa reported that there was a gap in serving MDM as they had run out of stock of food grains.

The MDM is cooked and served by a cook who has been appointed by the SMC.

The enrolment in the Madarsas is as follows.

Name of Madarsa	Enrolment B+G=T	Attendance B+G=T
Madarsa Habibiya	22+32=54	14+13=27
Madarsa, Bazme Ansar	24+27=51	20+16=36
Madartsa Kadaria- Kala Talab	44+36=80	25+20=45
Madarasa Anware Tayyabi	20+21=41	12+11=23
Total	110+116=226	71+60=131

Out of total enrolled about 58 percent children were present on the day of visit

All the Madarsas reported that the food grains were supplied on a regular basis and there was adequate stock available in the Madarsas. The disbursement of funds had also been regular.

There was no discrimination observed in the serving of MDM and the cook was observed distributing the MDM.

Both the children and community members were satisfied with the quality of MDM served.

No health check up had been carried out in the Madarsas in the current academic session.

No regular supervision has been carried out of the MDM by the SMC members or district officials.

<p>District 4: Sawai Madhopur</p>	<p>A. General information of sample schools</p> <p>For the present study an effort was made to cover every block in the sample. 40 schools were selected randomly in Sawai Madhopur district. Out of these schools- 4 were urban PS, 4 were urban UPS, 16 were rural P.S and 16 were rural UPS. Special focus in this district was given to schools with high gender gap, drop out, migration and those which were prone to natural calamities.</p> <p>B. Regularity in serving MDM:</p> <p>On the day of the visit of the MI, cooked MDM was being served in all the schools. Out of the total 40 schools surveyed, all schools the MDM was being cooked in the school premises under the supervision of the SMC. Only in 1 school the MDM was disrupted for 5-15 days.</p> <p>While 97.5 percent schools reported that the MDM was being served regularly in the past 12 months, 2.5 percent schools reported that there was an interruption in serving of MDM. The average number of the days MDM was disrupted ranged from 8-15 days. The reasons for disruption included irregular and non-receipt of cooking cost on time and non-availability of cook.</p> <p>C. Trends in Enrollment, Attendance and number of children availing MDM</p> <p>The total enrollment in the surveyed schools was 3385 (1441 boys and 1944 girls). As per the attendance register 66.0 percent children (69.6 percent boys and 63.3 percent girls) were present in the schools on the day of the visit of the MI. According to the MDM register, out of the total children enrolled 64.1 percent children (68.2 percent boys and 61.0 percent girls) were availing MDM on the day of the visit. On the basis of head count the MI found that out of the total enrolment 61.1 percent children (64.6 percent boys and 58.6 percent girls) were physically present and were availing of MDM.</p> <p>D. Regularity in delivering food grains to school</p> <p>95 percent schools were receiving food grains on a regular basis. In the remaining 5 percent schools the supply was irregular, in 70 percent schools reported that the foodgrain is delivered between one to three months, while 30</p>

percent schools reported that it took more than three months for food grain to be supplied.

In case of such delays the food grain is borrowed from neighboring schools. 92.5 per cent schools reported that they had a buffer stock to deal with any situation of irregular supply. The remaining schools stated that they do not keep a buffer stock.

75.0 percent schools had received the specified quantity of foodgrain, whereas 25.0 percent reported that lesser quantities than specified. The variation ranges between 2-5 kg per bag.

The quality of food grain was reported to be good only in 2.5 percent schools whereas 85 percent teachers reported that it's was average, and in 12.5 percent schools teachers articulated that the quality of food grain was poor.

E. Regularity in delivering cooking cost to school

17.5 percent schools reported that they have been receiving cooking cost in advance while 82.5 percent were not found to be receiving cooking cost in advance. Delay in receiving cooking cost ranged from 1 month to 5 months. As in other districts, the teachers often tend to borrow cooking materials /spices from the neighboring shopkeepers. The main reason of delay in delivering cooking cost includes delays in transferring money from the district and block level into SMC account.

In majority of the schools the cooks are paid in cash. In majority of the surveyed schools cooks complained that the amount paid for cooking was not adequate.

F. Social equity

In most schools it was observed that children were made to sit in a line (with or without a dari patti) for the MDM (60 percent schools had this arrangement).In no any schools children were found to be sitting in groups according to their caste identity. In 20 percent schools children were sitting in gender groups.

In schools no discriminatory pattern was observed with regard to serving of MDM. All caste group children, both boys and girls were seen to be serving food in these schools. However in 2.5 percent school the gender divide was

clearly visible and girls were made to serve the food. In 90 percent school the cook/helper was serving the MDM.

No overt discrimination related to religion caste and gender was observed in majority of the schools covered in the sample.

G. Variety of Menu

In all 95 percent schools MDM was being prepared according to the weekly menu decided by the State. In the remaining schools the Menu was decided by the local SMC.

In all the schools visited by the MI the MDM logo was not displayed in any school but in 47.5 percent of the schools the weekly menu was not displayed in the school premises. A variety is being ensured in most schools. Generally fruits, rice, dal and green vegetables have been included in the menu. However in 2.5 percent schools it was reported that fruits and green vegetables are not included in the menu. The reasons cited for not including these items in the menu are: non-availability of fruits and green vegetables in remote villages and high prices of fruits. In some cases it was observed that the MDM in charge is indifferent and does not purchase the fruits.

H. Quality and Quantity of MDM

In 92.5 percent schools children reported that the MDM scheme was good and beneficial.

In 93 percent schools children reported that they were satisfied with the quantity and in 92.5 percent schools were satisfied with quality of MDM supplied. In the remaining schools children expressed dissatisfaction with the MDM supplied. The main reason was non-inclusion of fruits and green vegetables in menu.

Some suggestions for improvement include- regular supervision by SMC members, training on health and hygiene to MDM in charge.

I. Supplementary Nutrition

The school health programme implemented by SSA/NRHM is functioning in the district. 60 percent schools reported that it was being implemented in their schools. Under this programme a health check up is carried out of all the

enrolled children by the ANM. A health card is maintained and children are provided Iron, folic acid, vitamin -A dosage and de-worming medicines as per requirement. In the surveyed schools it was found that only 70 percent schools had maintained a health register. Majority of the schools reported that the health check up is carried out on a yearly basis.

In 35 percent schools it was reported nutrition supplements had been provided to the children on a regular basis. In the remaining school the supply was irregular.

Some suggestions include: regular monitoring of health check up, maintenance of records of health check, follow up of children who are found with health problems/difficulties should be ensured.

J. Status of Cooks

In 40 surveyed schools where cooking is being carried out in the school premises, the cooks have been appointed by the SMC. In all surveyed schools cooks and helper were available as per requirement. The average remuneration paid to the cooks and helpers ranges from Rs.1000 per month. As per MDM norms the cooks are paid a remuneration of Rs. 1000. However in some cases where the required number of cooks has not been appointed the cooks/helper is paid more.

In only 90 percent schools the cooks were paid their remuneration regularly. In the remaining schools there was a delay in payment of remuneration. The delay ranged from 3- 6 months.

85 percent schools reported that the cooks were paid in cash.

In the 40 school surveyed was MDM is supplied by SMC there were 72 cooks (62 women and 10 men) working in MDM. The caste composition was as follows: 18 percent women and 1.4 percent men belongs to SC group, 11.1 percent women and 2.8percent men belonged to ST, 40.3 percent women and 6.9 percent men belonged to OBC groups, 4.2 percent women and 2.8 percent men belonged to General caste and 12.5 percent women belonged to minority caste group. There is no single men is working as cook from Minority caste group.

K. Infrastructure

Kitchen Sheds

In 80 percent schools there were pucca kitchen sheds. In the remaining schools two situations prevailed either there were no kitchen sheds (8 schools) or the kitchen sheds were not usable.

The kitchen sheds had been constructed under various development schemes including SSA.

There should be an assessment of the construction of kitchen cum store. It was observed that due to poor quality of construction the kitchen cannot be used properly.

Storage Facility

Storage facilities for food grains were available in 57.5 percent schools. In the remaining schools storage facility had been sanctioned and in some it was under construction. .

In these schools food grain was being stored in the classrooms or HM room in gunny bags.

Water

In 62.5 percent schools water was available for the purpose of cooking, drinking and washing. The sources included hand pump and tank.

Utensils

Utensils for cooking and serving were available in 90 percent schools.

Cooking Gas/fuelwood

In the 27.5 percent schools firewood is used for cooking MDM. In the 52.5 percent schools are using LP gas while 20 percent schools are using both gas and firewood.

L. Safety and Hygiene

Only in 82.5 percent schools teachers reported that safety measures were taken while cooking MDM. Hygienic practices (like washing hands before meals) were reported in 85 percent schools. Cleanliness is maintained in 85 percent schools. Teachers of 15 percent schools reported that discipline was poor in the school during distribution of MDM. In majority schools teachers reported that they took adequate measures to conserve water while washing

utensils.

M. Community Participation

The participation of parents, VEC members and PRIs and monitoring and Supervision of MDM was reported only in 5 percent schools. Teachers and parents in majority of primary and upper primary schools reported that they were satisfied with quantity of MDM served. However in 2.5 percent schools teachers and parents stated that the quantity of MDM was poor.

The parents were however, not aware of the nutritional value of the MDM distributed to the children.

N. Inspection and Supervision

Regular inspection of MDM was reported in all the surveyed schools. No inspection of MDM has been carried out by the SPMU. The DPO had not visited 62.5 percent schools. The BRC/CRC and other block officers carried out quarterly inspection of the MDM in 87.5 percent schools

O. Impact

According to teachers in 35 percent schools the MDM had helped in improving the enrollment and 55 percent school teachers reported incensement in attendance of children in schools and 65 percent had also helped in improving the general nutritional levels of children. The teachers in only 95 percent schools reported that MDM had led to minimizing caste and gender divides. The incidental benefits were reported in 12.5 percent schools and include regularity, exposure of the siblings who accompany the older children to an educational environment.

MDM in Madarsas : District Sawai Madhopur

There are a total of 192 Madarsas registered in district Sawai Madhopur, but presently only 122 are functional. There are a total of 390 para teachers working in the Madarsas. A total of 10680 students are enrolled in these Madarsas.

A total of 3 Madarsas were covered during the Monitoring visit.

The enrolment in the 3 Madarsas are as follows

Name of Madarsa	Total Enrolment			Attendance on the day of visit		
	B	G	Total	B	G	Total
Madarsa TalimUl Islam	73	72	145	33	40	73
Madarsa Gujratian	72	73	145	52	60	112
Madarsa Maqtaba Sayedian	62	63	125	46	51	100
Total	207	208	415	134	151	285

Out of total enrolled 68.6 percent children were present on the day of visit.

Only in one Madarsa the MDM logo was displayed. The MDM was not being served according to the prescribed Menu as the stock of food grain (rice) had finished.

In all the Madarsas the MDM is cooked in the premises.

It was reported that there is a delay in the delivery of foodgrains in the Madarsas.

All the children were being served the MDM without any discrimination.

Due to shortage of foodgrain in all the three Madarsas, the prescribed Menu was not being followed.

It was reported that the quality and quantity of MDM given to the children was good. But it was observed that the surroundings where the food is cooked is not hygienic.

No health check up had been carried out in the sample Madarsas .

None of the Madarsas had a separate kitchen shed or storage facility as most of them were functioning in hired premises.

It was reported that no official had visited the Madarsasa to supervise the distribution of MDM.
